

AMENDMENTS TO THE SPECIFICATION

In the Specification

Please substitute the following amended paragraph(s) and/or section(s) (deleted matter is shown by strikethrough and added matter is shown by underlining):

Page 7, line 17 - line 23:

Thus, the mobile telephone of the system of the invention may be either in normal mode and receive the values of the selection parameters from the mobile telephony network ~~of~~ or in preset mode and receive the predefined values of the selection parameters given by the computer. When the mobile telephone is in preset mode, the presetting function overwrites the values of the parameters received from the network and replaces the values by the predefined values transmitted by the computer.
